CORE EXPERTISE

Blockchain Investigations

- Multi-chain tracing (BTC, ETH, TRON)
- Wallet attribution & clustering
- Laundering pattern analysis
- Exchange exposure analysis

Threat Intelligence

- Threat actor attribution
- Infrastructure correlation
- Underground ecosystem analysis
- Ransomware investigations

OSINT & Automation

- Python investigative tooling
- Data enrichment pipelines
- Metadata correlation
- Large-scale intelligence collection

Investigations & Operations

- Cybercrime investigations
- Insider threat investigations
- Fraud investigations
- Operational intelligence workflows

PROFESSIONAL SUMMARY

Cybercrime and blockchain investigations specialist with 8+ years of experience across law enforcement, threat intelligence, and operational cybercrime investigations.

Focused on ransomware attribution, blockchain tracing, underground ecosystems, infrastructure analysis, and OSINT-driven investigative workflows.

PROFESSIONAL EXPERIENCE

Team Lead / Product Architect — Threat Intelligence & KYC

FS Group | June 2022 – Present

- Lead blockchain and threat intelligence investigations involving ransomware operations, insider threats, laundering analysis, and underground ecosystem attribution.
- Coordinated development of a proprietary KYC/KYB intelligence platform integrating automated analytical workflows and operational screening capabilities.
- Conducted a multi-chain insider fraud investigation involving BTC, ETH, and USDT tracing resulting in attribution of a high-ranking internal actor linked to approximately \$4.5M in unauthorized withdrawals.
- Performed blockchain tracing and laundering analysis across TRON and Bitcoin ecosystems, identifying layering behavior, intermediary wallet structures, and exchange exposure patterns.

Senior Security Analyst (Investigations)

FS Group | June 2018 – June 2022

- Conducted cybercrime investigations involving ransomware operations, underground marketplaces, stealer ecosystems, credential leaks, and

CERTIFICATIONS

- Threat Intelligence Analyst
- ISO/IEC 27001 Auditor
- CSI Linux Certified Investigator

EDUCATION

- Master of Laws (LLM)
National University "Odessa Law Academy"

infrastructure attribution.

- Designed analytical workflows for processing 236M+ stealer logs and 3.7B+ credential combinations supporting large-scale threat intelligence collection.
- Decrypted and analyzed a 975GB forensic server image by identifying custom application-level encryption logic embedded within backend infrastructure.
- Conducted attribution investigations targeting underground marketplace operators through infrastructure correlation, operational artifact analysis, OSINT pivots, and wallet tracing.

Cyber Police Officer — Cybercrime Division Cyberpolice Department | March 2016 – May 2018

- Participated in operational cybercrime investigations involving financial fraud, ransomware activity, and digital evidence analysis.
- Conducted tracing of digital assets and infrastructure artifacts associated with cross-border cybercrime investigations.
- Supported investigative coordination with international law enforcement partners including Europol and Interpol.

SELECTED INVESTIGATIONS

\$4.5M Insider Crypto Fraud Investigation

Multi-chain attribution involving BTC, ETH, and TRON laundering analysis resulting in identification of a high-ranking insider actor.

Shadow Marketplace Infrastructure Attribution

Decryption and forensic analysis of a 975GB server image leading to attribution of operational cryptocurrency infrastructure.

Vidar MaaS Attribution

Infrastructure and operational ecosystem analysis of a malware distribution network including C2 infrastructure correlation.

Phobos Ransomware Investigation

Blockchain tracing and exchange-related attribution linked to ransomware-related cryptocurrency activity.
