

Ihor Bykov

Cybercrime Investigator | Blockchain Intelligence | Ex-Cyberpolice

Constanța, Romania | ihor.bykov@gmail.com | [LinkedIn Profile](#)

SUMMARY

Senior cybercrime and blockchain investigations specialist with 8+ years of experience across law enforcement, threat intelligence, and operational investigations.

Background includes ransomware investigations, darknet ecosystem analysis, adversary attribution, cryptocurrency tracing, and large-scale intelligence collection. Experienced in combining OSINT, blockchain forensics, infrastructure analysis, and custom automation workflows to support complex investigations involving multi-chain asset tracing and cybercriminal operations.

Currently leading investigative and product-focused initiatives related to threat intelligence, KYC/KYB workflows, and large-scale analytical systems.

CORE SKILLS

- Blockchain Investigations & Asset Tracing
- Threat Intelligence & Attribution Analysis
- Cybercrime Investigations
- OSINT & Infrastructure Analysis
- Ransomware & Fraud Investigations
- Wallet Clustering & Transaction Analysis
- KYC/KYB Intelligence Workflows
- Python Automation & Data Enrichment
- Darknet & Underground Ecosystem Research
- Team Leadership & Investigation Operations

EXPERIENCE

Team Lead / Product Architect — Threat Intelligence & KYC

FS Group | June 2022 – Present

- Lead operational threat intelligence and blockchain-related investigations involving ransomware activity, insider threats, laundering patterns, and underground ecosystem analysis.
- Coordinated development of a proprietary KYC/KYB intelligence platform integrating automated analytical workflows, enrichment pipelines, and operational screening

capabilities for enterprise investigations.

- Conducted a multi-chain insider fraud investigation involving unauthorized withdrawals across BTC, ETH, and USDT networks. Correlated blockchain activity, leaked financial records, and internal operational data to identify a high-ranking internal actor responsible for approximately \$4.5M in asset theft.
 - Performed blockchain tracing and laundering analysis across TRON and Bitcoin ecosystems, identifying transaction layering behavior, intermediary wallet structures, and cash-out exposure through centralized exchanges.
 - Supported attribution-focused investigations through OSINT automation, infrastructure analysis, and custom Python tooling designed for operational intelligence workflows.
-

Senior Security Analyst (Investigations)

FS Group | June 2018 – June 2022

- Conducted cybercrime investigations involving ransomware operations, underground marketplaces, stealer ecosystems, credential leaks, and operational infrastructure attribution.
 - Designed methodologies and analytical workflows for processing more than 236M stealer log records and 3.7B+ credential combinations, enabling large-scale proactive threat intelligence collection and enrichment.
 - Decrypted and analyzed a 975GB forensic server image by identifying custom application-level encryption logic embedded within backend infrastructure, enabling attribution of previously unidentified cryptocurrency-related operational artifacts.
 - Conducted attribution investigations targeting underground marketplace operators through infrastructure correlation, operational artifact analysis, OSINT pivots, and cryptocurrency wallet tracing.
 - Developed custom automation workflows and investigative tooling for enrichment, data correlation, infrastructure analysis, and large-scale intelligence collection.
-

Cyber Police Officer — Cybercrime Division

Cyberpolice Department | March 2016 – May 2018

- Participated in operational cybercrime investigations involving financial fraud, ransomware-related activity, and digital evidence analysis.
- Conducted tracing of digital assets and infrastructure artifacts associated with cross-border cybercrime investigations.
- Supported investigative coordination with international law enforcement partners, including Europol and Interpol, on cyber-enabled financial crime cases.

- Assisted in collection, preservation, and analysis of digital evidence within criminal investigations involving online fraud and illicit financial activity.

CERTIFICATIONS & EDUCATION

- **Master of Laws (LLM), National University "Odessa Law Academy"**
- **Foundation Level Threat Intelligence Analyst**
- **ISO/IEC 27001 Auditor**
- **CSI Linux Certified Investigator**
